NIOX VERO at TSANZSRS 2016

We will showing the NIOX VERO for the first time at the TSANZSRS Conference 2016 in Perth.

Visit our booth and measure your FeNO on the NIOX VERO and take the FeNO Challenge and find out how FeNO can change your Patient treatment and management decisions.

NIOX VERO® is a point-of-care device for assessing airway inflammation in Patients with respiratory problems such as asthma.

NIOX VERO is a further development of NIOX MINO®, the most widely used device for measuring airway inflammation in clinical practice and clinical studies all over the world.

The NIOX VERO replaces the NIOX MINO and the major advantages are as follows:

* On-Screen Patient Incentive * In-Built Battery for Portability. * Quick analysis time, approximately one minute. * Quick start-up time.

FeNO (Fractional exhaled Nitric Oxide) testing with NIOX VERO offers individualised asthma management that can improve the treatment and care of Patients.

For further information on FeNO click on this link.....

COPDGene Results Presented at ERS Amsterdam 2015

ndd Medical's EasyOne Pro Mobile PFT Devices Provide Stable Test Measurements of 2,000 Patients in Phase II of NIH's COPDGene Trial.

ndd Medical Technologies, Inc. announced that the company's EasyOne Pro® provided highly accurate and stable pulmonary gas exchange measurements for patients across the 21 sites of the National Institutes of Health (NIH)'s COPDGene clinical trial.

The COPDGene® trial chose and uses the EasyOne Pro as the exclusive DLCO testing device in the second phase of the study. More than 2,000 patients have been tested in Phase II using ndd's advanced ultrasonic transit-time based mobile pulmonary function testing (PFT) device.

"In the COPDGene study the EasyOne Pro's DLCO measurements have been shown to be more reproducible than any previous study to date," said Robert Jensen, Ph.D., head of the study's PFT Quality Assurance. "Protocols using quality assurance programs along with high precision testing instruments like the EasyOne Pro can significantly reduce variability of DLCO measurements, which allows earlier assessment of change over time for pulmonary function".

A second presentation at ERS also showed that measurements of DLCO using the EasyOne Pro remained stable in 5,100 control subjects tested over a four-year period, without any calibration of the instrument during this time.

"The accuracy and ease of use of our point-of-service ultrasonic transit-time technology-requiring no calibration, no maintenance and no disposables other than Spirettes® and Barriettes® make it the ideal tool for researchers to use to get the best possible lung-function measurements that meet testing quality standards," said Georg Harnoncourt, CEO of ndd Medical Technologies.

TSANZSRS Conference 2016 Perth

Visit us at the TSANZSRS 2016 Conference, Perth Convention and Exhibition Centre, 1-6 April 2016 to see the following products:

* Hans Rudolph Products * LiteAire Disposable Cardboard Spacers * Bedfont Smokerlyzers * Lung Flute * NIOX VERO - FeNO * EasyOne and Easy on-PC Spirometers * EasyOne Pro LAB - Spirometry, BPT, DLCO and Multi-Breath Nitrogen Wash.

Get the latest EasyWare and EasyWare Pro

Get the latest EasyWare and EasyWare Pro Software

The EasyWare software for the EasyOne spirometer and the EasyWare Pro software for the Easy on-PC and the EasyOne Pro DLCO system are periodically upgraded and you can download the latest software free of charge from the Manufacturer's (nnd Medical Technologies) website at <http://nnd.ch/index/downloads-software>

These software downloads are executable files so if you work in a Hospital or a Government agency please make sure you have an IT person present to download and install the software as these type of files require administrator permission.

Once you have downloaded and installed the latest EasyWare software you should then connect your EasyOne spirometer to your computer and run the EasyWare software as this will also update the internal software in your EasyOne Spirometer.

If you require any assistance please telephone us on 1300 136 855.

Go to the EasyWare software page here.....
