Welcome to Niche Medical's Customer Newsletter.

This newsletter is designed to inform our customers of the latest information on our products and services.

We highly value your input and feedback and encourage you to send all feedback and comments to Craig Abud by simply replying to this email.

If for any reason you do not wish to receive this newsletter in the future, simply click on the Safe Unsubscribe button at the bottom of this newsletter.

Please feel free to pass this newsletter onto those who may find it valuable. There is a forward email icon located at the bottom of this newsletter.

Introducing Nasal Nitric Oxide Measurement with NIOX VERO which is now TGA approved and available to use in Australia.

Nasal Nitric Oxide is a sensitive and specific marker for Primary Ciliary Dyskinesia (PCD).

NIOX VERO nNO application provides a non-invasive and cost-efficient way to differentiate patients with PCD from healthy individuals.

NIOX VERO is the only CE marked nNO device with documented clinical data for differentiating patients with PCD from healthy individuals.

For a demonstration of the NIOX VERO Nasal Application simply reply to this email or telephone our office on 1300 136 855.

TSANZSRS Post-Graduate Workshop at TSANZSRS in Adelaide.

The Future of MBW: Clinical applications in Adult and Paediatric respiratory disease.

This course aims to provide attendees with an understanding of the basic physiological principles and current state of standardisation for the multiple breath washout technique (MBW).

It will discuss how this non-invasive and easy to administer test can be used as an exciting novel adjunct in the diagnosis and management of obstructive airways diseases in clinical (and research) pulmonary practice.

The graduate course will include the opportunity for practical MBW measurement demonstrations from manufacturers. It will outline approaches to interpretation / application of results in clinical practice.

Download the MBW Workshop information sheet here.....

With the launch of the EasyOne Air Spirometer we introduced the new FlowTube design.

One of its main advantages is that the rectangular shape ensures unprecedented accuracy in flow and volume measurements.

In addition, with the new FlowTube it is easy to check precisely whether it has been inserted correctly. These various patented innovations increase the outstanding usability and performance of ndd devices.

- FlowTube - not just another mouthpiece.

- Improved accuracy

- Improved ergonomics and usability
- Outstanding infection control
- Innovations and patents

Get the latest EasyOne Connect software at the link below.

The EasyOne Connect software is used for the EasyOne Air and the Easy on-PC and can also be used to archive data from the EasyOne worldspirometer into a patient-centred database.

You can download the latest software free of charge from the ndd Medical Technologies website at <http://nnd.ch/index/downloads-software>

The major changes in the new EasyOne Connect / Easy on-PC software are as follows:

- Improved functionality of the EasyOne Air Spirometer with a New Firmware Update.
- Create your own custom Bronchial Provocation Tests including Hypertonic Saline and Exercise protocols.
- Enter and trend external measurements: FeNO, MIP, MEP, SpO2 values add them to the spirometry report and or transfer the values to the EMR system.
- Define standard text blocks and quickly add them to the report as needed.

These software downloads are executable files so if you work in a Hospital or a Government agency please make sure you have an IT person present to download and install the software as these type of files require administrator permission.

For assistance please telephone our office on 1300 136 855.

Get the latest EasyOne Connect software here.....

Get the latest EasyOne Pro software at the link below.

The EasyOne Pro software is used in the EasyOne Pro DLCO system and the EasyOne Pro LAB which features the Multi-Breath Nitrogen Washout.

The software is updated twice per annum and you can download the latest software free of charge from the nnd Medical Technologies website at <http://nnd.ch/index/downloads-software>

The major changes in the new EasyOne Pro software for Spirometry, Provocation, DLCO and MBNW tests are as follows:

- Create your own custom Bronchial Provocation Tests including Hypertonic Saline and Exercise protocols.
- Enter and trend external FeNO, MIP, MEP, SpO2 values add them to spirometry report and or transfer the values to the EMR system
- New predicted reference equations "Stanojevic (GLI, 2017)" for DLCO and Lung Volumes.
- Define standard text blocks and quickly add them to the report when needed.

These software downloads are executable files so if you work in a Hospital or a Government agency please make sure you have an IT person present to download and install the software as these type of files require administrator permission.

For assistance please telephone our office on 1300 136 855.

Get the latest EasyOne Pro software here.....

We are pleased to present the first in a new series of ndd Video Guides. This one on how to "Customize your own Bronchial Provocation Protocols" has recently been completed.

Watch "Customise your Bronchial Provocation Protocols" here....

Visit us at Booth 1 at the TSANZSRS Conference in Adelaide from 24-27 March where we will have the following products on display:

EasyOne Air and Easy on-PC Spirometers

NIOX VERO FeNO + Nasal Nitric Oxide

EasyOne Pro DLCO / MBW

LiteAire Spacer

Smokerlyzers - Breath Carbon Monoxide Monitors

Suchatski Ultrasonic Nebuliser
