

EasyOne Filter

It's not just a Filter. It's the EasyOne Filter.

Double protection

The EasyOne Filter keeps the ambient environment clean while the NDD mouthpiece protects from cross contamination.

The EasyOne Filter meets the 2019 ATS/ ERS spirometry standards for accuracy.

Optimal fit for minimal resistance, while still providing high quality test

Trust the EasyOne Filter from NDD.

A spirometry filter solution by the spirometry experts.

Designed to fit

Keeps the ambient environment clean for patients and healthcare professionals

Low resistance for high quality spirometry

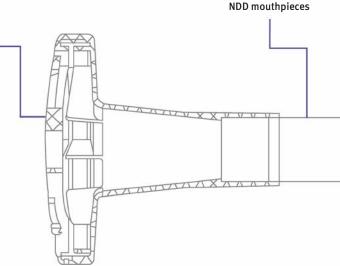

Optimal filter efficiency & accuracy

Unique patented technology*

Specifications

Filter properties, tested at Nelson Labs (US)

- Bacterial Filtration Efficiency (BFE): 99.99%
- Viral Filtration Efficiency (VFE): 99.99%

Filter pad material: Electrostatic fibers

Dead space: ≤ 60 ml

Resistance: ≤ 1.5 cm H₂O

Waveform test

Passes ISO 26782 waveform testing required by ATS/ERS (2019)

Part number

ND2091-422: EasyOne Filter for FT. Box of 100*

ND2091-412: EasyOne Filter for SP. Box of 100*

- *EasyOne Filter for SP (Spirette) fits the Easy on-PC Spirometer and the EasyOne World Spirometers.
- *EasyOne Filter for FT (FlowTube) fits the EasyOne Air Spirometer.

Unique design

*patent pending

The unique EasyOne Filter with its innovative diffusor guarantees highly accurate measurements while ensuring high filter efficiency, low flow resistance, and minimal dead space volume.

Trending results of expiratory data with and without filter are equivalent. Fully compliant with the 2019 ATS/ERS standards.
